

Ultraportable C2 Cases for Mobile, Deployed Ops

60" Diagonal Display Screens

Interactive Touch Panels

30" Diagonal Display Screens

VTC

Pico, Micro & Standard-sized Projectors

- Portable collaboration package utilizing C2 applications
- Numerous display configuration options
- Case sizes to meet mission requirements
- Lightweight portability
- Endless array of content packaging

Ultra Portable C2 Kits

Ultra Portable TOC Kits are suited for platoon level and below, forward deployed Command and Control operations. TOC Kits contain an array of C2 systems and peripherals including laptops, display systems, various VTC platforms, encryption devices and other content typically determined by mission requirements.

Electronics are protected within durable, weather resistant Pelican cases. Because of their small sizes they're easily transported in smaller aircraft and land vehicles.

TOC Kit

Case 1660 Dims: 28.20" x 19.66" x 17.63"

Case Configurations

These rugged, portable cases are suitable for an endless variety of contents such as small to large video displays, computers, communications equipment and tools.

Smaller cases are ideal for single-set display solutions while larger cases can hold 2 – 3 sets of displays. We offer multiple sizes of foldable screens along with the latest micro and pico projectors, which boast 20,000 – 30,000 hours of lamp life. These lightweight display systems are easily transportable and cost effective.

Contact Spec Ops, Inc. (SOI) today to discuss case and integration options.
